INDEX TO VOLUME X

Adams, E. P. Note on a problem in electrostatics . . . 241
Atkinson, F. V. The mean value of the zeta-function on the critical line 122
Bailey, W. N. On the product of two Laguerre polynomials . 60
Banerjee, D. P. On the expansion of a function in a generalized Neumann series 261
Bosanquet, L. S. Note on differentiated Fourier series . . 67
Burchnall, J. L. The differential equations of Appell's function F_4 145
Busbridge, Ida W. An additional note on general transforms of the class $L^p(0, \infty)$ $(1 < p \leqslant 2)$ 11
—— The theory of general transforms for functions of the class $L^p(0, \infty)$ $(1 < p \leqslant 2)$ (II) 13
Chaundy, T. W. Hypergeometric partial differential equations (III) 219
Cooper, R. Transformations of enumerable sets which are dense in an interval 247
Crum, M. On two functional equations which occur in the theory of clock-graduation 155
Davenport, H. Minkowski's inequality for the minima associated with a convex body 119
Daymond, S. D., and **Hodgkinson, J.** A type of aerofoil . 136
Dickinson, D. R. On Tchebycheff polynomials 277
Erdélyi, A. Note on the transformation of Eulerian hypergeometric integrals 129
—— Transformation of hypergeometric integrals by means of fractional integration by parts 176
Fuchs, W. H. J., and **Wright, E. M.** The 'easier' Waring problem 190
Gillis, J. Note on a conjecture of Erdős 151
Goodspeed, F. M. Some generalizations of a formula of Ramanujan 210
Guinand, A. P. Finite summation formulae 38
—— Summation formulae and self-reciprocal functions (II) . 104
Hodgkinson, J., see **Daymond, S. D.**
Kober, H. Wurzeln aus der Hankel-, Fourier-, und aus anderen stetigen Transformationen 45
Linfoot, E. H., and **Shepherd, W. M.** On a set of linear equations 1
—— On a set of linear equations (II) 84
Love, A. E. H. Boussinesq's problem for a rigid cone . . 161
Mohan, B. On self-reciprocal functions 252
Pars, L. A. Note on a paper by Wintner 135
Rado, R. Some elementary Tauberian theorems (II) . . 28
Shepherd, W. M., see **Linfoot, E. H.**
Simmons, N. Free stream-line flow past a vortex . . . 283
—— Free stream-line flow past vortices and aerofoils . . 299

Taussky, Olga. An algebraic property of Laplace's differential equation 99
Titchmarsh, E. C. An example in the theory of the spectrum of a function 75
Vijayaraghavan, T. On a conjecture of Gillis 320
Watson, G. N. Three triple integrals 266
Whitehead, J. H. C. On certain invariants introduced by Reidemeister 81
Whitrow, G. J. On the Lobatchewskian trigonometry of a static substratum 313
Wright, E. M., see **Fuchs, W. H. J.**
